

Topics in Econometrics 2024/25

Lecturers: Frank DiTraglia, James Duffy, Maximilian Kasy, Sophocles Mavroides, Martin Weidner

Time and Location: Mondays 16:00-17:30 in Seminar Room A. (during MT & HT)

Structure of the course: This is a reading group style course for 2nd year MPhil students. The majority of weekly sessions will consist of student presentations, followed by group discussions. Occasionally we will have short faculty introductions into specific topics.

Attendance is required for enrolled students: You are expected to consistently attend sessions in person, in both MT and HT. The goal of this course is to give you a broad overview over the state of econometrics, and attendance of all sessions will help you with this goal.

Coursework: Every student will hand in two “referee reports” (=essays with at most 2000 words each) for papers discussed during the course. All student coursework is due on Friday of week 0 of TT. Additionally, students are expected to sign up for two presentations.

Presentation Sign-up: Please sign up for two presentations at this link:
(Coming soon.)

Course outline and readings: Please see course page,
